- There have been some articles about the possibility of Graterford Prison being relocated and the land opened up for development. This does not seem to be a likely option based on the current zoning and the anticipated costs involved versus the cost the relocation versus the cost of renovating the existing facilities.
- There have also been some articles concerning high levels of TCE in the air in the Collegeville/Trappe area. Note that these levels are within EPA/DEP guidelines. There will be a public meeting on this issue on February 20th from 7 to 9 pm at the Musser Auditorium in the Pfahler Building of Ursinus College. A link to an article concerning this topic is presented here.
